

Are you planning to replace a conventional plastic by a sustainable polymer? Are you planning a new product made of bioplastics and require very specific material and processing properties?

We will be very happy to assist you in the research or modification of a bioplastic material suitable for your specific application requirements. Our offer ranges from a simple consultation on materials and a feasibility study to the development of complex materials.

Our team has over 25 years experience in the domain of bioplastics and has knowledge about the technical characteristics and processing parameters of most polymers on the market. In addition, diverse testing machines are available at our labs for the testing of specimens, compounds and components.

Contact us . We will be very happy to help you.
